## The Babin Machine Tool advantage:

- **Babin Machine Tool** has been in business for over 56 years with sales across the country.
- We have been rebuilding **HARDINGE** HLV-H precision lathes for 40+ years.
- We have received a well earned name and reputation for our **HARDINGE** rebuilding results.
- Each **HARDINGE** style lathe, our Model TML-5C lathe series, is delivered from our facility.
- Each lathe we fully qualify for accuracy, fit and finish, with test cuts performed. We install optional digital readout systems, offer tooling such as **HARDINGE** 5C collet sets, chip guards, Albrecht keyless drill chuck, USA made live center, Aloris toolpost, and more.
- Our years of rebuilding **HARDINGE** HLV-H lathes gives us insight that no other dealer could have nor offer. No other dealer can do what we do! We know what we sell.
- Our ST model includes our proven USA made servo threading system integrated into the lathe we specify. The ST offers easy touch screen data entry for Metric, English, and multi-start pitches. The servo threading system simplifies threading with RH and LH capability.
- Our TML-5Ce/m model is equipped with the standard Eng/ Metric gearbox for threading.

When deciding on a new 5C toolroom lathe, you have the option of selecting a lathe from a catalog or machinery dealer who would ship a lathe unchecked in a crate, OR, you can choose to purchase a precision toolroom lathe that will indeed be precision. Your new lathe will be backed by a company that knows the lathe inside and out.

**Our reputation comes with each lathe.**

Sincerely,  
Paul Babin  
*President*

*"If you need a machine and don't buy it, then you will ultimately find you have paid for it, but don't have it"*  
**Henry Ford**
